✝ CALVARY
PRESBYTERIAN CHURCH

CHILDREN'S MINISTRY WELLNESS POLICY

We know how important the health of your child is to you. It is important to us, too. With this knowledge in mind, please **DO NOT** bring your child to the nursery if they are currently experiencing or have recently had any of the following symptoms:

- Fever (100.4 or higher per CDC) or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat (if strep throat, must be on a physician prescribed antibiotics for **at least** 24 hours)
- Congestion and/or a runny nose that is thick or dark in color
- Nausea and/or vomiting
- Diarrhea
- Unexplained rashes or skin infections/conditions (besides diaper rash)
- Eye Infections of any kind
- Ringworm, scabies, or active head lice
- Any acute infectious disease or communicable childhood disease (etc. COVID-19, chicken pox)

The nursery reserves the right to refuse entrance for a child exhibiting any of the above symptoms.

If your child has a clear runny nose or other symptoms due to allergies:

- Please let the child check-in worker know upon drop-off. We understand that some symptoms can remain even after a child isn't contagious and that allergies can often mimic other conditions, including COVID-19 symptoms.

If your child becomes sick while in the nursery:

- You will be contacted **immediately** and your child will be promptly returned to your care.
- If immediate return is not possible, your child will be isolated in a manner that allows nursery worker(s) to safely monitor them until you are able to pick them up.
- Please note that our nursery workers cannot administer any type of medication.

If your child becomes sick after attending the nursery:

- Please contact the nursery coordinator immediately at nurserycoordinator@calvarypca.org. Nursery workers and parents of children possibly exposed may be notified. Notification is especially important with infectious diseases such as COVID-19, chicken pox, pink eye, lice, ringworm, etc. ***Your child's confidentiality will be kept if at all possible, but cannot be guaranteed.***
